REQUEST FOR PROPOSALS – WATER METER REPLACEMENTS

The Town of Wakaw is requesting quotes for the **replacement and installation of Neptune MACH 10 water meters with cellular R900 endpoint for approximately 450 residential and commercial properties.** We have been approved under the Canadian Community Building Fund to upgrade to a smart meter system which will allow us to record real-time, accurate water readings and eliminate the requirement of manual readings each quarter.

The successful plumbing company will supply labour and appropriate tools for the replacement of meters. The Town of Wakaw will provide the upgraded meters and endpoints. Should additional repairs to existing infrastructure be required, the plumber will seek approval from the Town of Wakaw prior to completion. The plumber is responsible for safety, all wages and taxes, permits if require, WCB premiums, bonding, and liability insurance for all risks.

The Town of Wakaw reserves the right to reject any and all bids and further does not commit to accepting the lowest priced bid. The successful company shall warranty all work, inclusive of labour and material for a period of one year from the date of completion of the project.

The estimated timeline for installation is October 1, 2026 to November 30, 2206.

Please forward proposals by 4:00pm on Tuesday, September 9, 2026

Pamela Wintringham
